Xuhao Luo

201 N Goodwin Ave, Urbana, IL, 61801

(217) 377-2021 ⋄ xuhaol2@illinois.edu

Education

University of Illinois Urbana-Champaign — Aug, 2021 - Now
Ph.D. Student in Computer Science

University of California San Diego — Sep. 2019 - Mar. 2021
M.S. in Computer Science, *GPA: 3.82/4.00*

University of Science and Technology of China — Sep. 2015 - Jun. 2019
B.S. in Applied Physics

Research Publication

· Zhiyuan Guo*, Yizhou Shan*(co-first author), **Xuhao Luo**, Yutong Huang, Yiying Zhang, **Clio: A Hardware-Software Co-Designed Disaggregated Memory System** (*Preprint*)

Experience

University of Illinois Urbana-Champaign — May. 2021 - Now
Research Assistant, advised by Prof. Tianyin Xu — *Urbana, IL*

· Building a framework for implementing and reasoning fail-slow tolerant distributed systems in an easy and effective way.
· Implementing a light-weight user-space thread library with cooperative task scheduling using **C++ Coroutine**.

Microsoft Research — Jun. 2020 - Sep. 2020
Research Intern — *Beijing, China*

· Designed and implemented task scheduling and dispatching system for distributed machine learning using **C++**.
· Designed and implemented **CUDA**-based high-performance inter-GPU communication channel for distributed ML within a large-scale GPU cluster.

University of California San Diego — Sep. 2019 - Dec. 2020
Research Assistant, advised by Prof. Yiying Zhang — *La Jolla, CA*

· Worked on building FPGA-based disaggregated memory system.
· Designed and implemented two network stacks on FPGA and host Linux server with **C++** HLS and **C**: A *go-back-N* based reliable stack with connection management, and a RPC-semantic connection-less stack for improved scalability. Bypass kernel using **libverb** to achieve 10Gbps throughput and μs-level latency at rack scale.

Agora.io — Jul. 2019 - Sep. 2019
Software Engineer Intern — *Shanghai, China*

· Participated in the development of CapSync, a distributed capability negotiation system for synchronizing media capability info between users, implemented with **C++** and **libevent**.

Projects

Distributed Messaging System — Apr. 2020 - Jun. 2020
Project for CSE223, Distributed System

· Built a distributed messaging system patterned on Kafka using **Go**. Provided messaging service via `Append()` and `Get()` APIs. Implemented *Topic* and *Partition* abstraction for replication management with **Zookeeper**.

Fault-tolerant Distributed Storage System — Sep. 2019 - Dec. 2019
Project for CSE224, Networked System

· Implemented a cloud-based file storage system patterned on Dropbox. Used multiple servers for duplicated file storage. Achieved consistence and fault-tolerance mechanism using **Raft** consensus algorithm.

Skills

Language	C/C++, Python, Go, Rust, Haskell, OpenCL, Verilog
Tools/Framework	TensorFlow, Docker, Zookeeper, LLVM, Google Test

Coursework

· CSE 224, Graduate Networked Systems
· CSE 232A, Graduate Database Systems
· CSE 221, Graduate Operating Systems
· CSE 223B, Distributed Systems
· CSE 230, Programming Languages
